

Product Approval Sheet

Customer : _____

Issued no : 2011. 03. 31.

Revision no :

- Product description : Metallized Polyester film capacitors
- Product code : PCMT 365 77104 / PCMT 365 77334
- Application :

CUSTOMER

PCMT 365/366/367

MKT RADIAL LACQUERED CAPACITORS (Dipped Type) – Orange

Pitch 5.0/7.5mm

365

366

367

QUICK REFERENCE DATA

Capacitance range (E12 series)	0.001 to 1.0□
Capacitance tolerance	± 10%, ± 5%
Rated voltage V_{Rdc}	63 V, 100 V, 250 V, 400 V, 630V
Rated voltage V_{Rac}	40 V, 63 V, 160 V, 220 V, 250V
Climatic category	55/105/56
Temperature range	-55°C ~ +105°C
Reference specification	IEC 60384-2
Performance grade	Grade 1 (long life)
Coating material	Qualified in accordance with UL94V-0

<p>FEATURES</p> <ul style="list-style-type: none"> . Low inductive wound cell of metallized (PETP) film . Cell protected by epoxy lacquer . Radial leads of tin coated wire . Withstand to solvents and rinsing liquids 	<p>APPLICATIONS</p> <ul style="list-style-type: none"> . Blocking and coupling . Bypass and energy reservoir application

SPECIFIC REFERENCE DATA FOR THE 630V DC CAPACITORS

Description	Value		
	at 1kHz	at 10kHz	at 100kHz
Tangent of loss angle (unit : 10^{-4}) $C \leq 0.1 \square$	≤ 75	≤ 130	≤ 225
Rated voltage pulse slope(dV/dt) _R at 100V (DC)	110V/□		
R between leads at 100V, for $C \leq 0.33 \square$	□ 30 000 □		
R between interconnected leads and casing;100V ; 1min	□ 30 000 □		
Withstanding voltage DC (cut off current 10mA) ;rise time 100 V/s	1008V ; 1min		

CONSTRUCTION**Description**

- . Low - inductive wound cell of metallized polyethyleneterephthalate film.
- . Protected by a hard, water repellent, solvent resistant epoxy lacquer.
- . Radial leads, tin-coated.

MOUNTING**NORMAL USE**

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoliers are designed for mounting on printed-circuit boards by means of automatic insertion machines. For detailed specifications refer to Chapter " PACKAGING "

SPECIFIC METHOD OF MOUNTING TO WITHSTAND VIBRATION AND SHOCK

In order to withstand vibration and shock tests, it must be ensured that the underside of the kinks are in good contact with the printed-circuit.

The capacitors shall be mechanically fixed by the leads

STORAGE TEMPERATURE

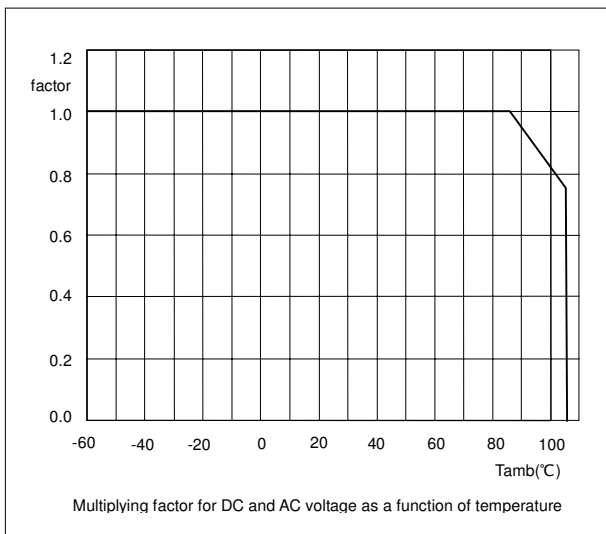

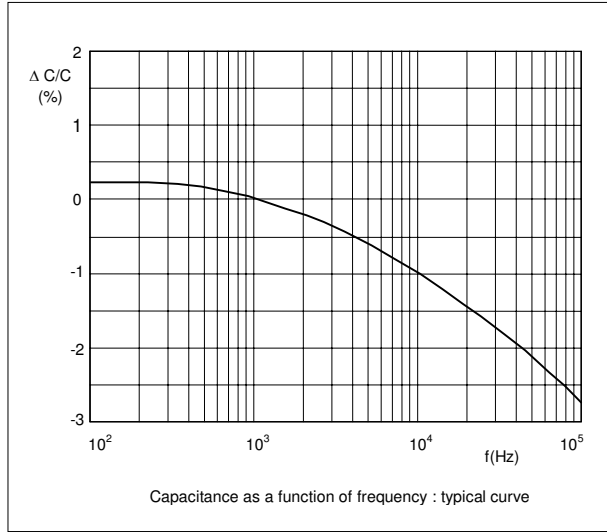

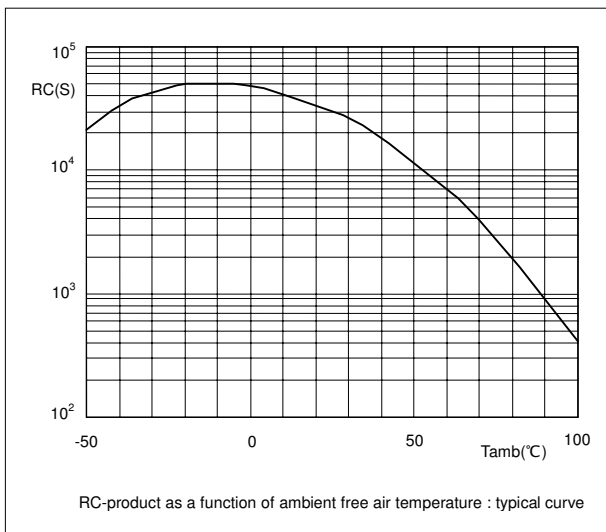

- . Storage temperature : $T_{stg} = - 25$ to $+ 40^{\circ}\text{C}$ with RH maximum 80% without condensation.

RATINGS AND CHARACTERISTICS

specified all electrical values apply at an ambient temperature of $23 \pm 1^{\circ}\text{C}$, an atmospheric pressure of 86 to 106 kPa and a relative humidity of $50 \pm 2\%$.

For reference testing, a conditioning period shall be applied of 96 ± 4 hours by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20%.

THE GRAPHS OF CHARACTERISTICS

MAXIMUM RMS (63V, 100V, 250V) VOLTAGE (SINEWAVE) AS A FUNCTION OF FREQUENCY

MAXIMUM RMS (400V, 630V) VOLTAGE (SINEWAVE) AS A FUNCTION OF FREQUENCY

APPLICATION NOTE AND LIMITING CONDITIONS

To select this capacitor for a certain application, 6 conditions must be checked :

1. The peak voltage (V_p) shall not be greater than the rated DC voltage.
2. The peak-to-peak voltage (V_{p-p}) shall not be greater than $2\sqrt{2}$ times the rated AC voltage to avoid the ionization inception level.
3. The peak current (I_p) shall not exceed the maximum peak current, defined as maximum voltage pulse slope (dV/dt) multiplied by the capacitance.

$$I_p \text{ max.} = C (dV/dt) \text{ max}$$

Or the voltage pulse slope shall not exceed the rated voltage pulse slope. If the pulse voltage is lower than the rated voltage, the values of the table may be multiplied by V_{Rdc} and divided by the applied voltage.

4. The dissipated power shall not be greater than the maximum permissible power dissipation stated above.
5. The free air ambient temperature for the capacitor is not exceeding the category temperature.
6. Since all metallized film capacitors have an intrinsically active flammability risk, it is recommended that these capacitors should only be used in circuits where the power can be limited to less than 5W to the capacitor, should a failure occur.

PRODUCT MARKING**Capacitors with a body length \leq 7.5 mm**

The capacitors are marked on the top or side in black ink with the following information :

- . Rated capacitance code in □ or □
- . Tolerance on rated capacitance : K = $\pm 10\%$, J = $\pm 5\%$
- . Rated DC voltage

Example of marking

**Capacitors with a body length of 10 mm or 10.5 mm**

The capacitors are marked on the top or side in black ink with the following information :

- . Rated capacitance code in □ or □
- . Tolerance on rated capacitance : K = $\pm 10\%$, J = $\pm 5\%$
- . Rated DC voltage
- . Code for dielectric material

Example of marking

**PACKAGE MARKING**

The package containing the capacitors is marked as shown.

**LINE MARKING EXPLANATION**

1. Manufacturer's name
2. Sub-family
3. Pb free marking(JEDEC-STD-97)
4. Type description
5. Capacitance value, tolerance voltage and climatic category (IEC)
6. Batch nr. & production year and week code
7. Quantity & product code (12NC)
8. Capacitance, tolerance and voltage

PACKAGING
DIMENSION OF TAPED PRODUCTS

pitch = 5.0mm(kinked leads)

Characteristics concerning taped products

Pull – out force of the component	$\geq 5\text{N}$
Pull – out force of the adhesive tape	$\geq 6\text{N}$
Tearing force of tape	$\geq 15\text{N}$
Storage temperature	- 25 to + 40°C
Relative humidity	Max. 80% without condensation

Outlines of reel and ammo pack (dimension in mm)

pitch = 5.0mm

Cumulative pitch error : 1.0mm/20 pitches

The max. number of empty places per reel shall not exceed 0.5% of total number of components per reel, but no more than 2 consecutive positions may be vacant.

INSPECTION REQUIREMENTS

Note 1 : Sub-clause numbers of tests and performance requirements refer to the Sectional Specification, IEC 60384-2 and Section One this specification.

Note 2 : Inspection levels are selected from IEC-Publication 410: Sampling Plans and Procedures for inspection by attributes.

Note 3 : In this table : p = periodicity in months
n = sample size
D = destructive
ND = non-destructive
IL = inspection level) IEC 410
AQL = acceptance quality level)

Note 4 : For this capacitors, considered as a solid construction, the periodicity of the vibration and shock test is reduced from 6 months to 36 months.

Clause number and Test	D or ND	Condition	IL	n	Performance Requirements
Group A inspection (lot by lot)					
Sub-Group A1	ND				
4.1 Visual examination		Detail	S4	1)	No visual damage , legible marking and as specified in Marking specification
Dimensions 2)			S3	1)	As specified in dimension table of this specification
Sub-Group A2 3)	ND				
4.2.2 Capacitance 4.2.3 Tangent of loss angle 4.2.1 Voltage proof		At 1kHz At 100kHz for C≤ 470nF At 10kHz for C> 470nF 63Vdc 100V, 1min 100Vdc 160V, 1min 250Vdc 400V, 1min 400Vdc 640V, 1min 630Vdc 1010V, 1min			Within specified tolerance As in rating and characteristics of this specification No permanent breakdown (cut-off current 10mA) or flash over Self-healing allowed Rise time : 100V/sec
4.2.4 Insulation resistance (test A)		63Vdc 10Vdc 100, 250, 400Vdc 100Vdc 630Vdc 500Vdc			As in rating and characteristics of this specification

1) Number to be tested : Sample size as directly allotted to the code letter for IL in Table 2A of IEC 410 (Single sampling plan for normal inspection)
The acceptance number complies with AQL value : 0.65 %

2) This test may be replaced by in-production testing, if SPC on dimensional measurements or other mechanisms to avoid parts exceeding the limits is installed.

3) The 100% End-of-line testing is followed by re-inspection by sampling in order to monitor outgoing quality level by defectives per million (DPM). The sampling level and the calculation of DPM values is in accordance with CECC 00 014, counting any parametric failure as a defective. In case one or more defectives occur in a lot, this lot shall be rejected.
