1 Safety Instructions

ATTENTION! Only skilled electricians may assemble and disassemble the housing of the product.

DANGER! Risk of life by electric shock!

Avoid contacting mains voltages!
Turn off the power of all circuits before working on the product!

ATTENTION! Risk of short-circuit!

Never bridge contacts!
Do not put things into ventilation slots or ports!

ATTENTION! Risk of injury by falling parts or impacts!

Mind respectable connections!
Install the product in the mentioned height!

- This product is not a toy and is not meant for children, because it contains small parts which can be swallowed and can injure when used inappropriately!
- Do not use any damaged products or parts.
- Remove or store the packing materials well, because children may cut themselves on them while playing. Furthermore, there is a risk of swallowing and inhaling of incidentals and insulating material.
- Install and store the product and its accessories in a way that does not infringe any person or property damage, eg due to falling or stumbling.
- Avoid extreme influences, e.g. like heat and coldness, humidity and direct sun insulataion, vibrations and mechanical pressure.
- Do not modify or change the product or its accessories! Also mind chapter "warranty and liability".
- Mind the specifications for transporting and use applicable methods, e.g. by using the original packing.
- If defects, mechanical damages, disturbances or other problems occur, which are not solvable with this manual, take the device out of work immediately and consult your dealer for questions, repairing or change like it is described in chapter "warranty and liability".
- A defective device may not be put into operation, but must be

protected against further use. Repairing, such as assembling and disassembling the housing is only allowed to skilled professionals. By repairing it yourself you will lose all warranties and there is a risk of electric shock and short circuit.

- Motion sensors are not suitable for use as components of an alarm system. They can trigger false alarms if the installation place has been chosen unfavourably.

2 Description and Function

This product is an infrared motion sensor for indoors and is specified as installation material. It reacts to heat radiation (infrared radiation) of moving objects that enter the detection area of the sensor, eg. people and animals, etc. The sensor must „see“ the area which is monitored. Thermal radiation propagates in a straight line, but is stopped by glass or other solid objects.

Entering the detection area of the sensor switches the connected electrical consumer on and after a (adjustable) time off again automatically. A built-in photocell prevents working of the motion sensor during sunlight. In addition, the ambient brightness can be adjusted by a regulator.

3 Intended Use

This product is made for home use like described in chapter 2. We do not permit using this product in other ways. Use the product only in dry interior rooms. If not attending to these regulations and notes on safety, it might causes fatal accidents, injuries and damages to persons and property.

5 Installing and Operating

Installation

DANGER! Risk of life by electric shock!

Avoid contacting mains voltages!
Turn off the power of all circuits before working on the product!

ATTENTION! Risk of short-circuit!

Never bridge contacts!
Do not put things into ventilation slots or ports!

1. Switch off the mains fuse.
2. Check with a voltage tester to be sure, all lines are really stress-free. If in doubt, a electrician must do the installation work.
3. Check the packing content for being complete.
4. Compare all products to be compatible to each other.
5. Remove the cover cap

95171/96005: by using a screwdriver.

95172/96007: by turning the cover cap anti clockwise.

- 95173: by pushing upwards.
- 96006: no cover cap included

Choose the installation place away from street lighting, plants or air conditioning vents. Avoid direct sun insulation eg. near windows.

6. Attach the cover cap to a wall or ceiling in a height, mentioned in the specifications - with the installation material. At this, attend to the cable location and its alignment. Also attend to the detection area and max. distance.
7. Install the motion sensor like shown:

Installing

95171

96005

Note:

L	phase (hot)
N	zero conductor (ground)
A	consumer (lamp)

8. Plug the luster terminal onto the provided lugs.
9. Connect motion sensor and cover cap and lock the connection.
10. Switch on the mains fuse.

Operating

Depending on the design of your motion sensor, it may only have some of the following options:

SLIDE SWITCH: Select between

ON: The motion sensor works without distance adjustment (PIR).

OFF: All functions are off.

PIR: Distance adjustment is activated.

PIR+MIC: Distance adjustment and microphone are activated in addition.

TIME: Adjust the lighting time. (10 s ~ 7 min.)
LUX: Adjust the photosensitivity. (3-2000 Lx)
SENS: Adjust the detection distance. (4-9 m)
MIC: Adjust the sound control sensitivity of the microphone. (30-90 dB)

Motion sensors work by day and night. For daylight use, set LUX to maximum (SUN) for correct work.

-  **night ON** Motion sensor only works by night.
 Motion sensor works by day and night.
-  **sens** Adjusts the sensitivity of the motion sensor.
- time-delay** Sets lighting time after activating between 5/30s or 1/3/5/8min.

6 Maintenance, Care, Storage and Transport

DANGER! Risk of life by electric shock!

Avoid contacting mains voltages!
Turn off the power of all circuits before working on the product!

ATTENTION! Risk of short-circuit!

Never bridge contacts!
Do not put things into ventilation slots or ports!

- The device is maintenance-free.
- Switch off the mains fuse and disconnect the product from mains!
- Use a dry and soft cloth to clean your product. Be careful to avoid scratches. Use a slightly moist cloth for heavy stains. Look out for live cables! Do not use any cleaning supplies. This can cause burns to the materials. Avoid liquid entry to the device.
- Avoid places with high temperatures, humidity, or places which can become wet, also during maintenance, care, storage, and transport.
- Keep the product away from children and store it at dry and dust-proof places!
- Keep the original packing for transport and to avoid damages.

7 Troubleshooting

Problem	Help
The product does not work.	<ul style="list-style-type: none"> • Check all cables for being connected the right way. • Check function of lamp and switch on mains fuse after complete installation. • Check the settings.
Sensitivity is not satisfying.	<ul style="list-style-type: none"> • Remove objects out of the detection area. • Temperatures >40°C can cause switching errors. • Attend to right installation height. • Adjust the sensitivity.
Lighting time is not satisfying.	<ul style="list-style-type: none"> • Adjust the lighting time.
other questions	<ul style="list-style-type: none"> • Consult your dealer.

9 Warranty and Liability

- The producer grants 2 years warranty to a new device.
- As the manufacturer has no influence on installation, warranty only applies to the product itself.

- If any fault or damage is detected on your device, please contact your dealer and provide your sales slip or invoice as evidence of the purchase, if necessary. Your dealer will repair the fault either on site, or send the device to the manufacturer. You make the work of our technicians considerably easier, describing possible faults in detail – only then you can be assured that faults, occurring only rarely, will be found and repaired with certainty!
- The manufacturer is not liable for damages to persons or property caused by improper installation, operation or maintenance, not described in this manual.
- Do not alter or modify the product or its accessories.
- Any use other than described in this user's manual is not permitted and causes loss of warranty, loss of guarantee, and non-liability.
- We reserve our right for misprints and changes of the device, packing, or user's manual.

10 Disposal Notes

According to the European WEEE directive, electrical and electronic equipment must not be disposed with consumers waste. Its components must be recycled or disposed apart from each other. Otherwise contaminative and hazardous substances can pollute our environment.

As a consumer, you are committed by law to dispose electrical and electronic devices to the producer, the dealer, or public collecting points at the end of the devices lifetime for free. Particulars are regulated in national right. The symbol on the product, in the user's manual, or at the packaging alludes to these terms. With this kind of waste separation, application, and waste disposal of used devices you achieve an important share

to environmental protection.
